

April 22, 2013

The Honorable Patrick J. Leahy
Chairman
Senate Judiciary Committee

The Honorable Charles Grassley
Ranking Member
Senate Judiciary Committee

Dear Chairman Leahy and Ranking Member Grassley,

We, the undersigned companies and organizations, are writing to express our support for Chairman Leahy's and Sen. Lee's ECPA Amendments Act, S. 607, which the Committee will consider shortly. The bill would update the Electronic Communications Privacy Act (ECPA) to provide stronger protection to sensitive personal and proprietary communications stored in "the cloud." We urge all Members of the Committee to support the bill.

ECPA, which sets standards for government access to private communications, is critically important to businesses, government investigators and ordinary citizens. Though the law was forward-looking when enacted in 1986, technology has advanced dramatically and ECPA has been outpaced. Courts have issued inconsistent interpretations of the law, creating uncertainty for service providers, for law enforcement agencies, and for the hundreds of millions of Americans who use the Internet in their personal and professional lives. Moreover, the Sixth Circuit Court of Appeals has held that a provision of ECPA allowing the government to obtain a person's email without a warrant is unconstitutional.

The ECPA Amendments Act would update ECPA in one key respect, making it clear that, except in emergencies, or under other existing exceptions, the government must obtain a warrant in order to compel a service provider to disclose the content of emails, texts or other private material stored by the service provider on behalf of its users.

This standard would create a more level playing field for technology. It would cure the constitutional defect identified by the Sixth Circuit. It would allow law enforcement officials to obtain electronic communications in all appropriate cases while protecting Americans' constitutional rights. It would provide clarity and certainty to law enforcement agencies at all levels and to American businesses developing innovative new services and competing in a global marketplace. It would implement a core principle supported by Digital Due Process, www.digitaldueprocess.org, a broad coalition of companies, privacy groups, think tanks, and academics.

For all these reasons, we strongly urge all members of the Senate Judiciary Committee to support the ECPA Amendments Act, S. 607.

Sincerely,
